

Environmental Health: cease some discretionary services

The budget proposals have been subject to a high level, whole population assessment of impacts.

Details about the specific individuals or groups who may be impacted will emerge upon implementation should the proposal be approved, therefore it is difficult at this stage to assess specific impacts against the Sustainable Community Strategy, against Finance, and against different vulnerable groups, locations, or partners.

Further Equality Impact Assessments and Disability Equality Impact Assessments will be conducted should the proposal be approved, as details around individuals and/or groups of people emerge.
