Key Decision	Yes
Urgent Decision	No
One Darlington: Perfectly Placed	Yes – Strategy to deliver the One Darlington: Perfectly Placed priorities.
Efficiency	N/A

MAIN REPORT

Information and Analysis

5. The Health and Social Act 2012 requires Local Authorities through Health and Well Being Boards to prepare a joint Health and Well Being Strategy based on their Joint Strategic Needs Assessment. It also provides the power for Health and Well Being Boards to look more broadly than health and social care and to consider the wider determinants of health including housing, employment, education, skills, leisure and the environment etc. In Darlington we have taken this wider interpretation of health in the development of our strategy. The strategy which is tailored to adhere to draft guidance issued by the Department of Health is aligned to the two overarching priorities for our community - One Darlington: Perfectly Placed. It is attached at **Appendix One**.

6. The purpose of the Strategy is to:
 - (a) set out a framework for partnership working
 - (b) assess local need
 - (c) maintain a focus on and continue improvements in outcomes
 - (d) consider the influences on health including wider social, environmental and economic factors and encourage integrated working and commissioning across these
 - (e) go beyond the simple identification of needs to addressing key issues
 - (f) not try to solve everything but concentrate on an achievable amount
 - (g) set out priorities for collective action that will have greatest impact and adopt a clear, simple, transparent and consistently applied process for doing so
 - (h) provide a strategic planning framework to influence supporting strategies, delivery plans and commissioning processes.

7. The Strategy provides an overarching planning and performance framework for the future planning and the development of other core strategies and delivery plans including a Health and Social Care Delivery Plan. The following diagram illustrates this relationship.

8. This strategy provides a policy framework for future planning that:-
- reaffirms our long-term vision for improving the wellbeing of local people and reducing inequalities in outcomes.
 - details the key issues linked to outcomes which will support the realisation of our two overarching priorities – One Darlington: Perfectly Placed.
 - is based on local evidence drawn from the Single Needs Assessment and is informed by national policy considerations and priorities.
 - proposes our top priorities focussing on the issues that will make the biggest difference to outcomes and add greatest value to collective action.
 - focuses on things that can be done in partnership rather than things that are the remit of a single agency, but also recognising that single agency action can make a significant impact towards outcomes.
 - provides a clear and transparent planning framework and prioritisation tool for informing the development and review of supporting strategies and for engaging with the community
9. New governance arrangements have been established by the Darlington Partnership to ensure the implementation of the strategy and the development of supporting strategies and delivery plans. These differ slightly arrangements previously reported to Cabinet at its meeting of 6th March 2012 (Minute no.C137). In particular the previous thematic group structure will be replaced by Operational Leads, who will take lead responsibility at the

Partnership Board for key areas of activity. Though the key areas of activity may change over time, the Operational Leads for 2012 to 2015 are as follows:

- (a) Community Safety – Police local commander
- (b) Children and Young People – Cabinet Member for Children and Young People
- (c) Health and Well Being – Chair of the Health and Well Being Board
- (d) Economic growth – private sector lead
- (e) One Darlington – Executive Director eVOLution
- (f) Creative Darlington – Chair of Creative Darlington Board

10. Within their operational partnership delivery arrangements Operational Leads will take responsibility for ensuring the following are included:

- (a) Involvement of a wider group of individuals – whether through Assemblies, workshops or another mechanism
- (b) Coordination with other groups – to ensure an effective calendar of events, potentially carried out through officer support arrangements
- (c) Transparency in decision-making – in order to show how the partnership is working effectively, particularly for Council Members and wider networks
- (d) Resources – if establishing additional groups or additional invitees, impact on partners' resources must be considered.

Outcome of Consultation

- 11. The methodology for the development of the strategy involved four partnership assemblies which were hosted in April/May 2012. They were attended by over one hundred individuals representing the following sectors/organisations: public health, Borough Council officers and Members, Primary Care Trust, Clinical Commissioning Group, NHS Foundation Trusts, Police Constabulary and Police Authority, Third Sector organisations, schools and colleges, Fire & Rescue and housing providers.
- 12. The development of the outcomes relating to the local economy were developed and agreed through a consultation process carried out with businesses in the development of Darlington's Economic Strategy, within which more than one hundred people were also involved.
- 13. The draft Strategy has been considered by the Darlington Partnership, Shadow Health and Well Being Board and Clinical Commissioning Group. It was posted on the Council's web site as part of an online discussion forum.
- 14. The outcome from these consultations informed the top priorities and key issues contained within the strategy.
