

### Model for Strategic and Representation Infrastructure Support

This model will need debate with the sector and other stakeholders to achieve an effective model.

Terms of Reference will need to be agreed but include Representation on other Forums including Task and Finish Groups. The group must also provide an arena for debating policy developing and agreeing joint bids. The group could have a standing invite for commissioners from a range of organisations and be facilitated by a rolling Chair and Secretariat or an organisation from the VCS.

Underlying operation of all of the groups are the principles of co-design.
