Dear Sirs,

### **Darlington Pedestrian Heart**

We are part of a consultancy team that has recently been commissioned to undertake a design and implementation project for the public realm within the town centre of Darlington. As part of this project there is likely to be changes in levels, surface materials and lighting which will need a comprehensive understanding of the underground services.

We would be grateful if you could supply all relevant information that you have on the service provision, with details of location in plan form and any information that you may have on service depths.

A plan is attached showing the extent to which service information is needed. The area required is within grid reference NZ 2814 SE.

If you have any queries regarding this matter please do not hesitate to contact Adam Greatrix on the above number. We look forward to your reply.

Your Sincerely,

GILLESPIES
