Initial equality impact assessment screening form

This form is an equality screening process to determine the relevance of equality to an activity, and a decision whether or not a full EIA would be appropriate or proportionate.

Directorate:	People Group
Service Area:	The DFG sits within Adult Services responsibility
	but includes children due to Occupational Therapy
	and DFG function also covering children services)
Activity being screened:	Disabled Facilities Grant process and approval
	changes
Officer(s) carrying out the screening:	Barbara Beadle
What are you proposing to do?	Introduce a new pathway with governance which and apply a risk assessment which evidence risk and impact on the person awaiting for a DFG. This is due to the increased demand for DFG and needing to support and progress those at highest need, risk and urgency. This will lead to longer waits and delays for people who are identified as lower priority due to risk and impact analysis.
Why are you proposing this? What are the desired outcomes?	 DFG The demand for DFG has increased significantly across the last 10 months. There is the need for a revised governance process to manage the demand, risk and urgency. Desired outcome - to progress with DFG for major works for those people evidencing the highest risk and impact following OT assessment.
Does the activity involve a significant	There is no removal of resource.
commitment or removal of resources?	The new pathway once fully embedded will align
Please give details	to the current governance structure of adult social care via discussion/supervision/practice support forum and DFG forums – no additional resource required.

Is there likely to be an adverse impact on people with any of the following protected characteristics as defined by the Equality Act 2010, or any other socially excluded groups?

As part of this assessment, please consider the following questions:

- To what extent is this service used by particular groups of people with protected characteristics?
- Does the activity relate to functions that previous consultation has identified as important?
- Do different groups have different needs or experiences in the area the activity relates to?

If for any characteristic it is considered that there is likely to be a significant adverse impact or you have ticked 'Don't know/no info available', then a full EIA should be carried out where this is proportionate.

aligns to demand and works across	-
Durham and Darlington therefore	>
activity can flex around demand	
fluctuations.	
Decision (Please EIA not relevant or Continue to full EIA:	
tick one option) proportionate: x	
Reason for DecisionThere was no clear governance or risk	
management approach to the administra	ation
of DFG. The introduction of this process	
ensures that those with the greatest risks	

	needs are prioritised. Whilst there will be an impact on people with disabilities and their carers these risks will be minimised through assessment to identify alternative support or arrangements whilst awaiting a decision on DFG applications. The implementation of the process will not deliver a significant adverse
